コンパクトERL設備(全体概要)

60MeV バージョン / 35MeV バージョンの両バージョンの予算を検討

Letter from Prof. Dr. Kwang-Je Kim

Dear Hiroshi,

Happy New Year!

Today is my first day back in lab since I returned on 23rd as the lab was closed for Holidays. Thank you for the proceedings of the ERL science workshop, which has already arrived. Thank you also for your hospitality at KEK and for Osaka trip. **I was much impressed with the progress you are making in the ERL project--the preparation of the cERL (the building was huge, not compact at all!), the advance in high voltage gun, the scheme for XFEL in 5 GeV ERL, and also the science case.**

I certainly would like to keep contact with you and your project. Once again, thank you and please give my regards to professors Wakatsuki and Shimomura, and other for me.

Best regards,
Kwang-Je
