

Highlights

HIGHLIGHTS

1. Atomic and Molecular Science	5
1-1 Lifetime-resolved Fluorescence Spectroscopy as a Sensitive Tool for Atomic and Molecular Excitation/Ionisation Processes	
2. Chemistry	8
2-1 XAFS Study on Photocatalysts for Water Splitting	
2-2 Two-dimensional SAXS-WAXS Study of Crystallization of <i>n</i> -hexadecane in Emulsion Droplets	
2-3 Structural Fluctuation of a Dilute Supercritical Mixture Measured by Small-angle X-ray Scattering	
2-4 Arsenic Behavior in Paddy Field during the Cycle of Flooded and Non-flooded Conditions	
3. Surfaces and Interfaces	13
3-1 Si(111)-6x1(3x1)-Ag Surface Structure Investigated by X-ray Crystal Truncation Rod Scattering	
3-2 Fabrication of a One-dimensional Ordered Structure of α -sexithienyl on Ag(110) and Cu(110)	
3-3 Change of Molecular Packing and Orientation from Monolayer to Multilayers of Hydrogenated and Fluorinated Carboxylate Studied by in-plane X-ray Diffraction Together with NEXAFS Spectroscopy at the C K-edge	
3-4 Condensation of Ions at a Surface Monolayer	
4. Electronic Structure of Condensed Matter	19
4-1 Oscillations of Surface Magnetization in Fe/Ni/Cu(100) Films Observed with the Depth-resolved X-ray Magnetic Circular Dichroism Technique	
4-2 Combinatorial <i>in situ</i> Photoemission Spectroscopy of Strongly Correlated Oxide Heterointerfaces	
4-3 Antiferromagnetic Domain Imaging of NiO(100) by PEEM, and the Non-magnetic Linear Dichroism Effect at the O K Edge	
4-4 Indication of Room-temperature Ferromagnetism Induced by Doped Co Ions in $Ti_{1-x}Co_xO_{2-\delta}$: An X-ray Magnetic Circular Dichroism Study	
4-5 Evaluation of Diffusion Barrier Continuity on Porous Low-k Films Using Positronium Time of Flight Spectroscopy	
5. Materials Science	25
5-1 Room-temperature Ferroelectricity in Co-crystals of Nonpolar Organic Molecules	
5-2 Formation of Ice Nanotubes inside Carbon Nanotubes	
5-3 Preferred Location of the Metal Ions in the Minor Isomers of $M@C_{62}$	
5-4 Positronium Time-of-flight Spectroscopy from a Porous Dielectric Film	
6. Crystallography	30
6-1 A 3.5 nm Self-assembled Coordination Nanotube	
6-2 Open-mouthed C_{60} Swallows a Hydrogen Molecule	
6-3 Design, Fabrication and Performance of a New Furnace for High-resolution Synchrotron Radiation Powder Diffraction Studies up to 1900 K – An Application to Determine the Electron-density Distribution of Cubic $CaTiO_3$ Perovskite at 1674 K	
7. High Pressure Science	34
7-1 High-pressure Structures of Methane Hydrates up to 86 GPa	
8. Biological Science	36
8-1 Structural Basis of the Allosteric Activation of HutP-mediated Anti-termination of Transcription	
8-2 Structural Basis for Ca^{2+} -induced Activation of Human PAD4	
8-3 Crystal Structure of the Ankyrin Repeat Domain of Human Ribonuclease L	
8-4 Crystal Structure of Homolog of Oncoprotein Gankyrin, an Interactor of Rb and CDK4/6	
8-5 Crystal Structure of the Membrane Fusion Protein, MexA, of Bacterial Antibiotic-xenobiotic Exporter	
8-6 Reclassification of Inverting Phosphorylases Based on Structure Determination	
8-7 Crystal Structure of the Human Sialidase Neu2	
8-8 X-ray Structures of Non-coding DNA; DNA Octaplex and its Split Quadruplexes Suggesting a Folding Mechanism of Eight Repetitive Sequences for Polymorphism Formation	
8-9 Crystal Structure of the Terminal Oxygenase Component of Biphenyl Dioxygenase Derived from <i>Rhodococcus</i> sp. Strain RHA1	
8-10 Role of the Helical Protrusion in the Conformational Change and Molecular Chaperone Activity of the Archaeal Group II Chaperonin	
8-11 Solution NMR Structure and X-ray Absorption Analysis of the C-terminal Zinc Binding Domain of the SecA ATPase	
8-12 Observation of Microbeam-irradiated Sites in Mammalian Cell Nuclei	
9. Medical Application	52
9-1 XAFS Analysis of Titanium in the Soft Tissues Surrounding Dental Implants	
9-2 Visualizing Human Articular Cartilage by X-ray Dark-field Imaging for Early Detection of Rheumatoid Arthritis	
10. Applied Science	55
10-1 Untangling the Mystery of Re-writable Optical Recording	
11. Instrumentation and Technique	57
11-1 Computed Tomographic Reconstruction Based on X-ray Refraction Contrast	
11-2 Development of Electron-ion Coincidence Spectroscopy and Electron Polar-angle-resolved Ion Coincidence Spectroscopy	
12. Theory	60
12-1 Studies of a Photoinduced Phase Transition from a Charge-density Wave to a Mott Insulator
