

Experimental Facilities

EXPERIMENTAL FACILITIES

1. Newly Developed Experimental Facilities	73
1-1 Overview	
1-2 BL-16A, A Variable Polarization Beamline for Soft X-ray Spectroscopy	
1-3 Transfer of the Structural Material Science Beamline from BL-1B to BL-8B	
2. Structural Biology Research Center	76
2-1 Overview	
2-2 Targeted Proteins Research Program	
2-3 Highlights of In-house Structural Biology Research	
2-4 Beamlines and Protein Crystallography	
3. The ISSP Beamlines	84
3-1 Extending the Photoemission Measurement System at BL-18A, SCAD-600	
3-2 Development of a High-efficiency Spin-polarized Photoemission Spectrometer at BL-19A	
4. ERATO Non-Equilibrium Dynamics Project	86
4-1 Outline	
4-2 Beamline Construction and Development	
4-3 100-ps Time-resolved X-ray Applications	
5. Slow Positron Facility	87
6. Summary of Experimental Stations	88
